DETAILED ACTION

Response to Arguments

Rejection under 35 USC § 112

Applicant's arguments, see pages 1-2, filed 04/14/2008, with respect to the rejection of Claims 1-4, 8-10, 16 and 23 have been fully considered and are persuasive. The rejection of Claims 1-4, 8-10, 16 and 23 held under 35 USC § 112 second paragraph has been withdrawn in view of Applicant's amendment to Claim 1 that better defines what elements are being claimed and is thereby more understandable.

Rejection under 35 USC § 102

Applicant's arguments, see pages 2-8, filed 04/14/2008, with respect to the rejection of Claims 1, 3-5, 8, 10, 16 and 23 have been fully considered and are persuasive. The rejection of Claims 1, 3-5, 8, 10, 16 and 23 held under 35 USC § 102 (b) has been withdrawn in view of Applicant's showing that the applied prior art reference to Schnieder is in fact Applicant's own work (not by another) and the detailed description of where the prior art is deficient with respect to the present invention. Examiner has carefully considered Applicant's arguments and the detailed description of the present invention and has determined that Claims 1-5, 8-10, 16, 19, 23 and 24 are

patentably distinguishable over the prior art of record due to the recited sealing point and sealing means and associated features.

Applicant's detailed discussion of such claimed features by contrast to the art of record is persuasive. In view of the foregoing and the absence of additional art, the reasons for allowance although clear for the record have been included below. As a result, Examiner withdraws the rejection to Claims 1, 3-5, 8, 10, 16 and 23 held under 35 USC § 102 (b).

Rejection under 35 USC § 103

Applicant's arguments, see pages 2-8, filed 04/14/2008, with respect to the rejection of Claims 2 and 9 have been fully considered and are persuasive. The rejection of Claims 2 and 9 held under 35 USC § 103 (a) has been withdrawn in view of Applicant's showing that the applied prior art reference to Schnieder is in fact Applicant's own work (not by another) and the detailed description of where the prior art is deficient with respect to the present invention. Examiner has carefully considered Applicant's arguments and the detailed description of the present invention and has determined that Claims 2 and 9 are patentably distinguishable over the prior art of record due to the recited sealing point and sealing means and associated features.

Applicant's detailed discussion of such claimed features by contrast to the art of record is persuasive. In view of the foregoing and the absence of additional art, the reasons for allowance although clear for the record have been included below. As a

result, Examiner withdraws the rejection to Claims 2 and 9 held under 35 USC § 103

(a).

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The present invention is allowable for at least the following reasons where the prior art of record fails to teach where a pressure regulating valve having a housing with a pressure regulation chamber where the pressure regulating valve has a sealing means and a sealing point, a regulating piston that is guided in the housing so that the pressure within the chamber and the can is kept at an equal state acting upon the end of the piston that is located in pressure regulation chamber and the sealing point is between the piston and the housing and is closed when the pressure in the regulation chamber is above the spray valve regulation pressure level and an additional sealing means seals off the free end of the piston at all times from the pressure in the can and the regulated pressure in the pressure regulation chamber so that the pressure prevailing on the free end of the piston is at all times independent of the pressure level within the can.

The prior art of record also fails to teach where the piston includes a piston shaft is sealed with the housing on both sides of the sealing point where a first seal is on one side of the sealing point and further makes up the sealing means on the piston end within the interior of the can for which pressure prevails within.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
